

Mastercam® NESTING

MASTERCAM'S EFFICIENT PART AND TOOLPATH NESTING MAXIMIZES MATERIAL

High yields can be crucial to a job's profitability. Mastercam includes essential nesting capabilities for parts and toolpaths:

- Fast, efficient interlocking part nesting maximizes material usage.
- Complete control over part-to-part distance, sheet margins, and more.
- Easily "drag" parts around on your sheet, or from sheet to sheet.
- Directly place CAD models from a variety of sources.
- Group sets of parts and assign part nesting priorities.
- Double-sided and common-edge nesting.
- Custom sheet definition and "filler" parts reduce waste.
- Automatic vertical/horizontal cut-offs preserve rectangular leftovers.
- Save sheet scrap for later use.
- Create custom labels and reports.
